Element	Section D – Risks	
D.2	Key information on the key risks that are specific to the issuer.	<p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> <li>• Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected.</li> <li>• An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited.</li> <li>• Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses.</li> <li>• Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong.</li> <li>• Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans.</li> <li>• Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors.</li> <li>• Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results.</li> <li>• Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model.</li> </ul>

		<ul style="list-style-type: none"> <li>• Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank’s derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model.</li> <li>• Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank’s revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities.</li> <li>• Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected.</li> <li>• As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, “Postbank”). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal.</li> <li>• Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments.</li> <li>• Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm.</li> <li>• Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank’s results of operations, financial condition and reputation.</li> <li>• Deutsche Bank’s non-traditional credit businesses materially add to its traditional banking credit risks.</li> <li>• Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments.</li> <li>• Deutsche Bank’s risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses.</li> <li>• Operational risks may disrupt Deutsche Bank’s businesses.</li> <li>• Deutsche Bank’s operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank’s reputation and lead to regulatory penalties and financial losses.</li> <li>• The size of Deutsche Bank’s clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly.</li> <li>• Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank’s results of operations and its share price.</li> <li>• Intense competition, in Deutsche Bank’s home market of Germany as well as in</li> </ul>

		<p>international markets, could materially adversely impact Deutsche Bank's revenues and profitability.</p> <ul style="list-style-type: none"> <li>• Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business.</li> </ul>
<b>D.3</b>	Key information on the risks that are specific and individual to the securities.	<p><b>Securities are linked to the Underlying</b></p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p><b>Risks associated with the Underlying</b></p> <p>Because of the Underlying's influence on the entitlement from the Security investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in interest rates.</p> <p><b>Currency risk</b></p> <p>Investors also face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p><b>Early Termination</b></p> <p>The terms and conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. Upon such early redemption or cancellation, depending on the event which resulted in such early redemption or cancellation, the Issuer will pay either a specified minimum amount in respect of each nominal amount, plus, in certain circumstances, an additional coupon, or, in limited circumstances, only the market value of the Securities less the direct and indirect costs to the issuer of unwinding or adjusting any underlying related hedging arrangements, which may be zero. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the terms and conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g., "knock-out" or "auto call" provision).</p> <p><b>Regulatory bail-in and other resolution measures</b></p> <p>If the competent authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal, interest or any other amount in respect of the Notes, to convert the Notes into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers commonly being referred to as the bail-in tool), or to apply other resolution measures including (but not limited to) a transfer of the Notes to another entity, a variation of the terms and conditions of the Notes or a cancellation of the Notes.</p>
