You are about to purchase a product that is not simple and may be difficult to understand.

## 1. What is this product?

**Type** German law governed interest rate-linked notes / Return depends on the performance of the underlying / Full capital protection against market risk

**Term** The product has a fixed term and will be due on 22 April 2031.

**Objectives** The product is designed to provide a return in the form of (1) conditional interest payments and (2) a cash payment on the **maturity date**.

(Terms that appear in **bold** in this section are described in more detail in the table(s) below.)  
**Interest:** On each **interest payment date** you will receive an interest payment of EUR 4.00 if the **reference level** is at or below the **interest barrier level** on the immediately preceding **interest observation date**. If this condition is not met, you will receive no interest payment on such **interest payment date**. The relevant dates are shown in the table(s) below.

Interest observation dates	Interest payment dates
19 April 2027	22 April 2027
19 April 2028	24 April 2028
18 April 2029	23 April 2029
16 April 2030	23 April 2030
17 April 2031	Maturity date

**Termination on the maturity date:** On the **maturity date** you will receive EUR 100.00.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

When purchasing this product during its lifetime, the purchase price may include accrued interest on a pro rata basis.

<b>Underlying</b>	The Solactive BUND 10Y 11am Yield Index (ISIN: DE000SLOQZ62) interest rate	<b>Issue date</b>	20 April 2026

The issuer may terminate the product with immediate effect in the event of obvious written or mathematical errors in the terms and conditions or if certain extraordinary events provided in the terms and conditions occur. Examples of extraordinary events include (1) material changes, particularly in connection with the **underlying**, and (2) events, in particular due to changes in certain external conditions that hinder the issuer in meeting its obligations in connection with the product or – depending on the terms and conditions of the security – otherwise affect the product and/or the issuer. In case of immediate termination, the return (if any) may be significantly lower than the purchase price, but will reflect the product's market value and, if higher, any minimum redemption (alternatively, in some cases the corresponding compounded amount may be paid out at the product's scheduled maturity). Instead of immediate termination, the issuer may also amend the terms and conditions.

Provided that in the event of any inconsistency and/or conflict between the foregoing paragraph and any applicable law, order, rule or other legal requirement of any governmental or regulatory authority in a territory in which this product is offered, such national requirements shall prevail.

## Intended retail investor

The product is intended for private clients who pursue the objective of general capital formation / asset optimization and have a medium-term investment horizon. This product is a product for clients who have sufficient knowledge and / or experience to

make an informed investment decision. The investor cannot bear any losses on the capital invested and attaches importance to capital protection.

## 2. What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product until 22 April 2031. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed or interest you may be paid under the investment.

You are entitled to receive back at least 100.00% of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash in before maturity or in case of immediate termination by the issuer.

If we are not able to pay you what is owed, you could lose your entire investment.

### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

<b>Recommended holding period:</b>		<b>5 years</b>	
<b>Example investment:</b>		<b>EUR 10,000</b>	
<b>Scenarios</b>		<b>If you exit after 1 year</b>	<b>If you exit after 5 years (Recommended holding period)</b>
<b>Minimum</b>	<b>EUR 10,000. The return is only guaranteed if you hold the product to maturity. You could lose some or all of your investment.</b>		
<b>Stress</b>	<b>What you might get back after costs</b>	<b>EUR 8,560</b>	<b>EUR 10,000</b>
	Average return each year	-14.4%	0.0%
<b>Unfavourable</b>	<b>What you might get back after costs</b>	<b>EUR 8,834</b>	<b>EUR 10,000</b>
	Average return each year	-11.7%	0.0%
<b>Moderate</b>	<b>What you might get back after costs</b>	<b>EUR 9,771</b>	<b>EUR 11,200</b>
	Average return each year	-2.3%	2.3%
<b>Favourable</b>	<b>What you might get back after costs</b>	<b>EUR 10,328</b>	<b>EUR 12,000</b>
	Average return each year	3.3%	3.7%

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes that have been calculated based on simulations using the past performance of the **underlying** over a period of up to 5 years. The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## 3. What happens if Deutsche Bank AG, Frankfurt is unable to pay out?

You are exposed to the risk that the issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. In doing so, the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product or convert it into shares of the issuer and suspend rights of the investors. With regard to the basic ranking of the issuer's obligations in the event of action by the resolution authority, please see [www.bafin.de](http://www.bafin.de) and search for the keyword "Haftungskaskade". A total loss of your capital invested is possible. The product is a debt instrument and as such is not covered by any deposit protection scheme.

## 4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

## Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	<i>If you exit after 1 year</i>	<i>If you exit after 5 years</i>
<b>Total costs</b>	EUR 461	EUR 361
<b>Annual cost impact*</b>	4.8%	0.8% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.0% before costs and 2.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

## Composition of costs

	<b>One-off costs upon entry or exit</b>	<b>If you exit after 1 year</b>
<b>Entry costs</b>	3.7% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 361
<b>Exit costs</b>	1.0% of your investment amount if you return this product before its settlement date. These costs are already included in the price you receive. The costs indicated assume that normal market conditions apply.	EUR 100

## 5. How long should I hold it and can I take money out early?

### Recommended holding period: 5 years

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 22 April 2031 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (where the product is listed) or (2) off-exchange. Save as otherwise disclosed in exit costs (see section "4. What are the costs?" above), no fees or penalties will be charged by the issuer for any such transaction. However if you sell the product in the secondary market you will incur a bid/offer spread. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

<b>Exchange listing</b>	Börse Stuttgart and Deutsche Börse AG	<b>Last exchange trading day</b>	17 April 2031 (Börse Stuttgart) and 17 April 2031 (Deutsche Börse AG)
<b>Smallest tradable unit</b>	EUR 100	<b>Price quotation</b>	Percentage

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

## 6. How can I complain?

Any complaint regarding the conduct of the person advising on, or selling, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted in writing at the following address: Mainzer Landstrasse 11-17, 60329 Frankfurt am Main, Germany, by email to: [x-markets.team@db.com](mailto:x-markets.team@db.com) or at the following website: [www.xmarkets.db.com](http://www.xmarkets.db.com).
